### POSTPONED CLASS:

**SC216 THE SECRET LIFE OF GALAXIES**

**Rescheduled - date TBD**

**(Original date: Monday June 1)**

**Rescheduled due to Cox Cable construction on presenter's street  
and possible service outage.**

There are over 100 billion galaxies in the observable universe and a single galaxy can contain over a trillion stars! When you look at pictures of galaxies have you wondered how they got those shapes, how they have formed and how they evolved? When did this begin, and will some of them collide? Are some much different than others? Is the Milky Way unusual or ordinary? This presentation will address those questions and more. We will also investigate simulation techniques used to expand our understanding and discuss current and future missions.

**Presenter: Robert B. Wilson**, Ph.D., NASA/Marshall Space Flight Center (ret.), OLLI STEM Committee

**Friday, June 12**

**(RESCHEDULED FROM MAY 18**

**10:00 AM - 12 Noon**

**(Click on class title to log in and view live class.)**

December's issue of Science magazine, the leading journal of the American Association for the Advancement of Science (AAAS), goes out on a limb and describes the major scientific breakthroughs of the past year. We will describe some of the selections, what qualifies them as breakthroughs, what the relevance to non-scientists may be, how future research pathways might be affected, and their status at the time of this presentation.
