**Tuesday, December 6**  
**10:00 AM - 12:00 PM**

**Presenter:**  
**Bruce Bollinger, OLLI STEM**

The integrated circuit (IC) is a fundamental element of our electronic world and is designed into just about everything we use today. No other technological advancement has had a more profound effect on our world and our everyday lives than the invention of the IC.

This presentation will take you through the pioneering development of the IC: from the early days of the vacuum tube, the invention of the transistor, through the development of the semiconductor manufacturing processes leading to the creation of the IC.

We will also dive into the advanced

manufacturing facilities where these components are born, following the complicated manufacturing processes and sophisticated equipment created to support the mass-production of these hi-tech, high-end components.

## **CURRENT ISSUES FORUM**

**Thursday, December 8  
1:00 PM- 3:00 PM**

**Discussion Leaders:**

Bob Greenberg, Mike  
Schlesinger, Mel Roth,  
Katherine Jones, Yasmin Vali,  
Alison Bok, Brad Gilbert, and  
Jaime Schvartsman

This course is a lively participatory group discussion of issues that are of current interest and will sometimes be controversial. It meets once a month to discuss current political, economic, and social developments taking place locally, nationally and around the world.

This week:

During the first hour of our class meeting, Bradley Gilbert, a member of our Current Issues Committee, will do a 15-minute presentation on the topic.

We will follow this with a lively and interesting exchange of ideas and opinions. Please note below the topic and the 3 trigger questions we will use to stimulate discussion.

**Topic:** What is the Government's role in delivering or subsidizing health care for Americans?

## Trigger Questions:

- Should government provide coverage for low income individuals and families who are citizens but cannot afford coverage?
- Should government provide coverage for individuals not legally in the US who cannot afford coverage?
- Should government subsidize Medicare for multi-millionaires?

During the second hour we will have the “Potpourri” portion of our class meeting. We will state each of the following questions/issues as they are stated here. Then we will invite everyone to volunteer their opinions and points of view for a discussion on each item. Here are the potpourri items:

- Should there be any restrictions on the content or language in messages conveyed by social media such as FaceBook, Twitter, Tick Tok, and Instagram?
- In the U.S.A. we have a House of Representatives that has a majority of Republicans and a Senate with a majority of Democrats. The President is a Democrat. Is this a formula for gridlock and conflict? What has to happen for both houses of congress to pass legislation and move forward and solve or alleviate the pressing problems that the U.S.A. face?
- What level of government—federal, state, local—should determine the criteria for access to abortion services?
