WHYS IN BIOMEDICINE (Session 1 of 4)

Tuesday, January 10
10:00 AM - 12:00 PM

From Dr. Moran:

Why Things Happen? An Incursion into our Lifelong Questions.

The question “Why?” is one of the first questions we ask seeking an explanation to events and phenomena occurring around us.

Several “Why’s” will be discussed in a new course, aimed at an audience

**Instructor:
Dr. Edgar Moran,
Professor of Medicine,
Emeritus, UCI**

interested in searching and acquiring answers.

We plan on answering some “why’s” in the following areas of our lives:

- Why’s in biology and medicine
- Why’s in our economy life
- Why’s on political current events
- Why’s in the World.

The intention of this course is to inquire into the causes of issues of major interest and find answers to the question “Why?”

I wish to develop our understanding, and to acquire further interest through discussions and study. If necessary, I will provide some of the necessary illustration and documentation.

This class was cancelled at the beginning of the fall semester due to the instructor moving out of state.

All enrolled members were notified of the cancellation via email.

**Friday, January 13
10:00 AM - 12:00 PM**

**Instructor:
Greg Autry, Ph.D., Clinical
Professor of Space

Activities in space are governed by the 1967 Outer Space Treaty, when only two nations – the Soviet Union and the U.S. – had space capabilities.

Today there are many nations with these capabilities.

This presentation will provide technical details of the Outer Space Treaty and provide insight into its limitations, especially regarding military use and exploitation of the Moon, Mars, and asteroids.
